

SERDAR BAKIRTAS

Senior Apple Platform & Product Engineer | Swift, SwiftUI, iOS Architecture

📞 +49-176-326-42435 @ serdarbakirtas@pm.me 🔗 <https://linkedin.com/in/serdarbakirtas> 🔗 <https://serdarbakirtas.com/> 📍 Berlin, GERMANY

SUMMARY

Senior Apple Platform & Product Engineer with **16 years** of experience in software and digital product development, including **10+ years** of native iOS development. Experienced in owning products and complex technical initiatives end to end, from system design and architecture through implementation, testing, release, and cross-functional delivery.

Strong background in Swift, SwiftUI, modular architectures, reactive programming, secure networking, computer vision, and performance-critical applications. Experienced in modernizing legacy codebases, designing privacy-first applications, and collaborating closely with product, design, backend, embedded, and data science teams.

PROFESSIONAL EXPERIENCE

Lead iOS and Product Engineer

Founder (Momena)

📅 04/2024 - Present 📍 Berlin, Germany

- Designed a privacy-first architecture with no backend API, ensuring local, encrypted storage on the device for family and child data.
- Developed the complete product architecture, including iOS app, website, and subscription service, with a focus on security and SEO.
- Implemented encrypted **iCloud backups** and **family sharing** features, enhancing privacy and collaboration for subscription users.
- Built a weekly AI-powered family recap using **LLM API**, delivering personalized summaries to parents while protecting child data.
- Executed **AES-256 encryption** and **StoreKit 2** subscriptions, providing robust security and seamless payment processing.
- Created shared business logic with **Kotlin Multiplatform** and implemented localization in three languages.
- Managed the entire product lifecycle independently, from development and App Store releases to user support.

Senior iOS Engineer

Magnosco

📅 03/2025 - Present 📍 Berlin

- Led system design for secure iPad-medical device communication via **mutual TLS**: certificate provisioning, Keychain trust, network modularization, security setup, **unit testing**.
- Collaborated closely with the embedded engineering team to define certificate generation, provisioning, and device-integration workflows.
- Integrated five **Core ML** models into an image-analysis pipeline for skin-cancer diagnostic support, working across model integration, **OpenCV**-based implementations, test pipelines, and validation with the Science team.
- Converted relevant Python-based image-processing logic into OpenCV implementations and created test data and unit tests to validate the resulting pipeline.
- Reduced ML pipeline memory usage by **~70%**, **from >4 GB to ~1.2 GB**, using actor-based isolation and async processing to eliminate iPad crashes.
- Collaborated with computer vision, data science, backend, and embedded teams to validate models, resolve integration issues, and deliver production features.
- Participated in iOS **hiring** by conducting technical and behavioral interviews, evaluating candidates, and contributing to hiring decisions.

Senior iOS/macOS Developer

Nord Security

📅 03/2023 - 04/2024 📍 Berlin, Germany

🔗 <https://nordlocker.com/download/mac/>

- Owned iOS File Management features including Trash Bin, file deletion, file restoration, and synchronization workflows.
- Integrated end-to-end security requirements into deletion and restoration flows, working across local state, synchronization, and encrypted storage.
- Designed and implemented the Trash Bin experience from end to end, including the interaction between UI, business logic, security, and synchronization.
- Wrote unit tests for business logic and modular components to maintain reliability across File Management workflows.
- Contributed to **GitLab CI/CD** by configuring Fastlane and CI workflows for File Management integration and automated unit testing.
- Worked in a cross-functional Scrum squad with iOS, Android, backend, product, design, and engineering, while contributing to cross-squad technical and UI/UX discussions.

Advanced iOS Developer

Diconium

📅 08/2021 - 02/2023 📍 Berlin, Germany

🔗 <https://apps.apple.com/de/app/volkswagen/id1517566572>

- Developed the Volkswagen iOS application from the ground up using SwiftUI, with Combine-based business logic.
- Contributed to architecture, system design, technical trade-offs, and implementation planning together with Volkswagen stakeholders.
- Presented sprint outcomes to Volkswagen stakeholders in biweekly review meetings, handled technical and product discussions, and contributed to subsequent sprint planning.
- Mentored a mid-level iOS developer through regular code reviews, feedback sessions, and quarterly career planning, defining development goals and supporting their progression to an Advanced iOS Developer title.
- Participated in quarterly PI Planning with the Volkswagen team and contributed to longer-term technical and product planning.
- Collaborated closely with product and UI/UX teams to refine designs and translate product requirements into scalable iOS solutions.
- Participated in an A/B test comparing subscription presentation as a carousel versus a list, using retention metrics to inform the preferred experience and managing rollout through feature flags.
- Contributed to GitLab CI/CD automation for testing and deployment workflows.

PROFESSIONAL EXPERIENCE

iOS Developer

Oculavis

📅 10/2019 - 07/2021 📍 Aachen, Germany
🔗 <https://apps.apple.com/de/app/oculavis-share/id1351261560>

- Integrated a real-time customer support chat using WebSockets, enabling communication between customers and the support team without relying on a third-party chat library.
- Worked on the reliability and integration aspects of the real-time communication flow.
- Implemented unit tests for business logic and application components.
- Integrated product analytics to support application usage monitoring and product insights.
- Worked in a small startup environment as one of two iOS developers, collaborating closely with product, design, backend, and engineering teams.

iOS Developer

VNGRS

📅 07/2015 - 07/2019 📍 Istanbul, Turkey
🔗 <https://apps.apple.com/us/app/puhutv/id1139761721>

- Owned the PuhuTV iOS application end to end as the sole iOS developer for four years, delivering the initial production release and subsequently owning feature development and bug fixing.
- Led a one-year **migration** of approximately 90% of the legacy Objective-C codebase to Swift.
- Designed the migration strategy to minimize production risk by progressively migrating business logic and networking before moving the UIKit-based UI layer.
- Introduced RxSwift for reactive application flows and integrated Brightcove Player for video streaming.
- Worked closely with the Doğuş Group product manager on product requirements, releases, and ongoing improvements

Interaction Designer & Developer

C-Section · Rafineri · Ping

- 📅 01/2010 - 06/2015 📍 Istanbul, Turkey
- Designed and developed interactive digital campaigns for major brands before transitioning into native iOS development.
 - Worked across both design and development, building interactive experiences with a strong focus on user experience.
 - Contributed to award-winning projects including **The FWA** Rule the Stars, a **Kristal Elma** Bronze award-winning Pegasus campaign, and the **Altın Örümcek** award-winning Tarkan website.

SKILLS

Core

Swift & Apple Platforms — Swift · SwiftUI · UIKit · Combine · RxSwift · Objective-C · async/await · Actors · Core Data · Swift Data · StoreKit 2

Leadership

Technical Leadership · Technical Mentoring · Code Reviews · Technical Interviews · Hiring · Career Development

Architecture

System Design · Modular Architecture · MVVM · MVI-inspired State Management · Secure Networking · Performance & Concurrency

EDUCATION

Bachelor's Degree - Business Advertisement

Eskisehir University

📅 2005 - 2009 📍 Istanbul, Turkey

Software Development

BilgeAdam Teknoloji, Professional Training Institute

📅 2009 - 2010 📍 Istanbul, Turkey

CERTIFICATIONS
